**CARTHAGE WATER & ELECTRIC PLANT
ELECTRIC RATES
PURCHASE POWER ADJUSTMENT**

The purpose of this rate is to accurately recover from customers the cost of wholesale electric energy purchased and generated more than the cost forecasted by Carthage Water & Electric Plant in conjunction with electric service rates. The actual cost of wholesale electric energy purchased and generated above the forecasted amount shall be billed as a Purchase Power Adjustment (PPA) determined by multiplying the billed kWh for the current month times a Purchase Power Adjustment Factor (PPAF). The calculation of the PPAF is as follows:

$$\text{PPAF} = A \times 1 / (1 - B)$$

Where:

PPAF = Purchase Power Adjustment Factor to be made per kWh billed.

A = The amount in cents or fraction thereof by which the average cost of power per kWh paid by the utility to purchase or generate energy during the previous twelve months* for which kWh is billed exceeds or is less than \$0.05346 per kWh.

B = The average percentage of power losses expressed decimally for the previous twelve months** as shown in the production and disposition analysis.

* Beginning Fiscal Year 2024, the calculation for the average cost of power per kWh will be reduced by one month, each month, until the formula represents an average cost of power for the previous six months.

** Beginning Fiscal Year 2024, the calculation for the average percentage of power losses will be reduced by one month, each month, until the formula represents an average loss percentage for the previous six months.

Effective July 1, 2023

CARTHAGE WATER & ELECTRIC PLANT ECONOMIC DEVELOPMENT RIDER

Purpose:

The purpose of this economic development rider is to encourage industrial development in the Carthage Water & Electric Plant (CWEP) service territory.

Definitions:

1. Annual Load Factor:

The annual load factor applicable to the customer shall be determined by the following relationship:

$$\text{Load Factor: } \frac{\text{Annual Energy (kWh)}/\text{Hours in Year}}{\text{Average Billing Demand (kW)}}$$

2. Average Billing Demand:

The sum of monthly electric billing demands divided by the number of months. For calculation of annual load factor, the twelve most recent billing demands are applied, unless fewer than twelve months are available or practical, in which case the most recent available billing demands shall be applied.

3. Month:

The term "month" or "monthly" refers to the billing month as determined by CWEP.

4. New Industrial Customer:

A customer in CWEP's service territory utilizing new facilities which result in new load.

5. New Load:

The term "new load" refers to the amount of load that is added to CWEP's system after a date defined by contract.

Availability:

Electric service under this rider is only available to new industrial customers otherwise qualified for service under the Primary Service Rate and the General Service Rate and who make application for service.

For purposes of this rider, an industrial customer is defined as any business primarily engaged in the manufacturing or processing of a product for sale or resale or any other similar industrial-related activities as may be determined by CWEP.

CARTHAGE WATER & ELECTRIC PLANT ECONOMIC DEVELOPMENT RIDER (CONTINUED)

Applicability:

Upon the written request of the customer and acceptance by CWEP, the provisions of this rider will be applicable to customers who meet the following qualifications:

- 1) The monthly billing demand of the new customer is reasonably projected to be at least 200 kW within two years of the new customer first receiving service.
- 2) The annual load factor of the new customer is reasonably projected to equal or exceed an annual load factor of 50% within two years of the new customer first receiving service from CWEP.
- 3) If, as determined by CWEP, the new customer load fails to meet the applicability criteria at the end of the two-year projection period starting with the first month's application of the incentive discount provisions, CWEP may terminate the application of the provisions for the remaining years of the discount period.
- 4) Once a customer achieves 200 kW of monthly billing demand, the customer must maintain an average billing demand of 200 kW and an average load factor of 50%, as determined by CWEP, to continue to be eligible for this rider.

Written requests for service under this rider shall be accompanied by sufficiently detailed information to enable CWEP to determine whether the new customer is reasonably expected to meet the above criteria. All written requests for service under this rider will be considered by CWEP; however, requests which do not conform to the purpose and availability of this rider will not be approved.

Monthly Incentive Credit:

Under this rider, the customer will receive a bill credit which is determined as a percentage of all otherwise applicable demand charges for all kW of demand billing:

First Contract Year:	25%
Second Contract Year:	20%
Third Contract Year:	15%
Fourth Contract Year:	10%
Fifth Contract Year:	5%
Sixth Contract Year:	0%

Termination:

Failure of the customer to meet or maintain any of the applicable criteria of this rider or the terms of any applicable service contract may lead to termination of the contract and the application of this rider. If CWEP determines that the customer is non-compliant, the customer will be notified within thirty days of the determination and credits available in this rider will no longer apply to future bills.

Effective July 1, 2019
